Projects

Stress Detection in Professionals using Deep Learning

Machine Learning | Python | Pandas | Tensorflow | Numpy | CNN | K Means Algorithm

- Stress causes serious life-threatening complications for people all around the world.
- The project is titled Stress Detection in Professionals Using Deep Learning and Machine Learning Technologies

Stores Analysis

Reports | Power BI | Data Analysis

- Power BI can be used to visualize data, such as load factor and destinations.
- The mission was identified using a name card and button, and a bar chart was created to identify the region and mission. Histogram and pie charts were created for company details and sales.

Accomplishments

- Certification In "[IBM Data Science. AI Development Certification](#)".
- Completing a certificate "[GUVI Academy Certificate PYTHON](#)".
- Completed a certificate Great Learning Academy "[Python for Machine Learning](#)"
